Camera Resolution: 640X480 CMOS

Video Quality: 25-30 fps

Minimum Compatible Android Phone: 2.0

Minimum Compatible IOS: iphone4

Unit is POE Compatible

Minimum Internet Stream bandwidth: 218 KBS

Noise Canellation: Both HW and SW

IP Rating: IP 44 (industrial Standard)

Certification: UL Listed P.S.,
CE Mark Certification,
FCC Certification

Patent: Pending

NOTICE: Recommended to Install MX-Player on Android Devices to avoid Video Hide Issues

(iVDP) - iSmart
SMART Internet Video Door Phone
Made By SMART Industry USA
QC By Digitcom Canada 

Installation Guide:

Installation Steps:

1. Connect the DC Power (12V - 1A) and LAN cable to Your router (Otherwise Connect LAN with POE without iVDP Power supply)
Note: (Do not connect the LAN if you are planning to use a WIFI connection)
2. Connect the Wires to your Alarm Secure sensor and Lock as Per diagram
3. Unscrew 4 Screws (2up+2Down) Open the cover Squeezing the middle section
4. Connect the Main Cable (5 Core) and Test
5. Fix the device on the back box or the wall with screws.
6. Fix back the cover part of iVDP with 4 screws

How to Configure the Smart iVDP WIFI Door Bell:

a) How to Download and install the APP and APK:

For IOS: Go to App Store and search Smart iVDP , Or Smart G4

For Android: Go to Google play and search Smart iVDP , Or Smart G4 or download from our website: www.smarthomebus.com

(At this time you must be connected to Internet to continue)

b) WIFI Configuration:

1. Leave the app open and do not close it.

2. Power on the Smart iVDP WIFI Videophone and wait until the voice message says "Welcome to Smart Home"

3. Continuously keep pressing the call button for 4sec. Then release your finger. The smart bell would say: "network configuration mode now, you have 5min please"

4. Go to WAN Setting of your phone (search wifi) then you shall find wifi name: Bell -00***

5. Connect to **Bell-00***** Network and enter the initial **password: 123456789**

6. Now Go back to the open Application.

Note: If you are connecting the Smart Door Bell module with RJ45 cable, then no need to follow the above settings

Adding iVDP Video Door Bell (Wifi bell)

c) Add Smart iVDP WIFI Door Bell device:

Click Add

There are multi ways to add the iVDP device By Scan QR; by Search; by shake or just input the Device S.ID#

Device is online

d) WIFI Settings (If you want to connect the device to Your Router Using Wifi):
